**Date:** Thursday, June 25, 2015 10:15:00 AM

---

David:

The SOW checks all of my response boxes. If the lawyers agree and Carl and/or Pam P. approves we should be ready to go. Based on your email below, it looks like you are wanting to start on 07/06. I will be back in Houston then and can meet with you at Malone for a couple of hours to get started, then let you run with the pump down because I have a bunch of Tronox stuff I need to do back in the office.

Warren

**Subject:** Removal SOW for Emergency Response - Injection @ Malone

I had to develop this SOW for the Removal folks. Susan Webster has asked me to send this to you to see if any legal language needs to be added to this SOW.....have to make sure everything is right before I go out there and begin injecting. Susan and Warren will also see if this is too much or too little – I have never developed an SOW for Removal, so this can be all wrong.

I could go out there this coming Monday (6/29/15), but I want to wait and go out 7/6/15, because no storms are in the extended forecast.....and due to the holiday for the week of 6/29/15 and no overtime, I would be out injecting for only a couple days.

Warren Zehner is the OSC; however, he has asked me to oversee the pump-down and injection operations as the Federal On Scene Coordinator Representative (FOSCR).
